

Trainee Anaesthetic Technicians

Trainee Anaesthetic Technician Training

The last chance to do the apprentice style training!

WDHB has made a commitment to continue to train Anaesthetic Technicians on this existing pathway while we can. If you are a Registered Nurse or have a relevant healthcare degree, this includes those with a paramedicine degree, who may be interested in branching out into the field of Anaesthetics, now is your chance to apply.

This is an 18 month to 2 year course dependant on your relevant history, which will commence in June/July!

Anaesthetic technicians assist and prepare operating theatres and clinics for anaesthetic procedures. Your clinical learning will be on-the-job and the theoretical component is studied through distance learning with Auckland University of Technology.

Based at North Shore, Waitakere Hospitals and the Elective Surgical Centre our theatre teams are amongst the biggest and busiest in the country. This is a great opportunity to work in a clinical environment right from the beginning and to learn from the ground up!

If you enjoy working with people, are adaptable and have a genuine desire to develop a career in Anaesthetics then apply today!

For general information about the national training program, visit: -
