

Anaesthetic Technician

INTERVENTIONAL CARDIOLOGY

INTERVENTIONAL RADIOLOGY

INTERVENTIONAL ONCOLOGY

Be part of a dynamic team using advanced medical techniques and imaging technology to improve the lives of our patients.

- ***Weekdays only***
- ***No night shift***
- ***A great work/life balance***

We are Intra, a world-leading provider of image-guided healthcare in Interventional Cardiology, Interventional Radiology and Interventional Oncology. Our innovative patient-focused approach is minimally invasive with faster recovery times. Our highly skilled multi-disciplinary teamwork in a modern environment with state-of-the-art equipment and lead the way in private image-guided healthcare.

Following global trends and due to the continued growth and success of our treatment procedures for heart disease, cancer, peripheral vascular, urology and gynaecological conditions we are recruiting for an Anaesthetic Technician to join our team.

The role will cover a minimum of 24 hours per week, with the potential for more hours picked up each week. You will need to be available to work across both our Newmarket and new North Harbour facilities.

Our company culture is highly supportive, celebrates success, values individuals and strives to be at the leading edge.

Apply now if you have:

- Registration with the Medical Sciences Council (MSC) of New Zealand (or be eligible for registration) and a valid Annual Practising Certificate
- Strong observational and crisis management skills
- Exceptional team and great communication skills
- Patient focus with excellent attention to detail
- The ability to effectively balance the needs of patients and clinicians

We can offer you:

- Competitive remuneration
- Professional development
- Great team and working environment
- Excellent company culture

Look no further if you are experienced, enthusiastic and seeking a new opportunity!
